Cunningham and Schuyler. It is recommended that this General Property Parcel Map be approved subject to such changes as may be necessary in order to conform with construction plans as finally adopted and approved; and that authority be granted to negotiate for the acquisition of the necessary right of way. The estimated cost of this right of way is $450,000.00 and authority is requested to set up this amount from funds available under Item 23, of the 1962-63 Construction Program. There are no dwellings or businesses located within the right of way taking areas or within the landlocked remainders, therefore, no relocation costs are necessary. The Right of Way Division will be in a position to begin obligating funds on this project within four months after receipt of the necessary approvals from the Bureau of Public Roads. The right of way plan appears to be satisfactory for right of way acquisition. (April 12, 1963)

SCHEDULE OF APPROVALS - APRIL 30, 1963

Administration Items

Federal Aid-General

1. Recommendation is made for approval and execution of the attached modification of the Federal Aid Project Agreement in duplicate for HPS-1(21). The following is the revised setup of funds:

	Prog. Item	Total Funds	Federal Funds	State Funds	Pro rata
Primary	224	204,247.98	102,123.99	102,123.99	50-50
Urban	279	347,138.92	173,569.46	173,569.46	50-50
Secondary	256	72,601.70	36,300.85	36,300.85	50-50
Interstate	153	1,313,152.40	1,181,837.04	131,315.36	90-10
TOTALS		1,937,141.00	1,493,831.34	443,309.66	

The modification increases the original project by a total of $448,000.00 to a new total of $937,000.00 for the Tri-State Transportation Study. (April 25, 1963)

Services-Engineering

2. In connection with the Howard, Needles, Tammen & Bergendoff agreement for Engineering Services dated August 6, 1962 for alignment studies from Newark Airport to Garden State Parkway, it is recommended that the original ceiling of $10,000.00 be raised to $11,700.00 to cover the cost of additional work requested by the officials at Newark, which work consisted of additional alignment studies, house counts, and cost estimates, which has required the consultant to expend more money than originally anticipated. The work on this project is now completed and the total billings will not exceed $11,700.00. (April 25, 1963)

3. Since the initial preliminary contract on Route 35 with Porter, Urquhart, McCreary & O'Brien, dated January 8, 1959, there have been many modifications to the original line. The time on this project has been extended from the originally planned 7 months to over 4 years. This time lapse has caused lack of continuity in the right-of-way work, which substantially raised the Engineering costs. With the route as presently defined, there are about 310 parcels affected. However, to properly locate these properties and to identify adjoining property owners, the consultant has abstracted over 750 deeds. Also, a considerable amount of field survey time was required in locating property owners because the records disclosed that the deed information, in many cases, was only referenced to land or objects which were no longer identifiable. The "Asbury Park Estates", an area subdivided into 20 feet lots, caused additional work in accurately locating the entire "Estate Boundry" in spite of the fact that the route was located to avoid the numerous other subdivisions in the project area. Many of the affected lots have been sold since the original records were obtained, which, therefore, required constant searching of the records. It is recommended that an additional $30,000.00 be set up for this project to complete the work as stipulated in the agreement. (April 25, 1963)

Utilities - Route 3, Section 1E

4. To accommodate the construction of Route 3, Section 1E, East Rutherford, Bergen County, it will be necessary for the Public Service Electric and Gas Company, and the New Jersey Bell Telephone Company to make temporary relocations of their facilities. It is recommended that the Utility Companies be reimbursed for this temporary construction. The Public Service Electric and Gas Company will be reimbursed at an estimated cost of $5,900.00 which includes approximately 10 per cent for contingencies. The New Jersey Bell Telephone Company will be reimbursed at an estimated cost of $1,100, which includes a sum for contingencies, Construction Program Year 1960-61, Item Number 3. (April 25, 1963)

NO. 14 - 1963

Utilities-Route 15, Section 7A

5. To accommodate the construction of Route 15, Section 7A, in the Township of Jefferson, Morris County, it will be necessary for the New Jersey Power and Light Company to interrupt and restore some of its electric service. It is recommended that the Utility Company be reimbursed for this work at an estimated cost of $6,690.00, Construction Program Year 1961-62, Item Number 2. (April 26, 1963)

Utilities-Route 21 Freeway, Sec. 5

6. Approval and execution is recommended of the attached Order No. 2 issued to the Public Service Electric & Gas Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Freeway Route 21, Section 5. Utilities-Route 29 Freeway, Section 12A

8. Approval and execution is recommended of attached Order No. 9, issued to the Public Service Electric and Gas Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Route (Freeway) 29, Section 12A, in the City of Trenton, Mercer County. The Utility Company is to be reimbursed for the actual cost of the rearrangement work which including approximately 10 per cent for contingencies is estimated at $40,300.00, Construction Program Year 1960-62, Item Number 29. (April 30, 1963)

Utilities-Route 129 Freeway

9. To accommodate the proposed construction of Freeway Route 129 in the Township of Lawrence, it was necessary for the Jersey Central Power and Light Company to revise its electrical construction plans to avoid conflict with the Freeway. The Utility Company has submitted two (2) invoices, one in the amount of $38,112.72 representing additional construction costs caused by building along the revised line as matched against what cost would have been by building along the original planned line. The second invoice, in the amount of $2,192.75, representing cost caused by additional expense to the Electric Company relative to changes in their right of way, necessitated by the revised electric plan. It is recommended that the Utility Company be reimbursed in the total amount of $40,306.47 representing the total cost to the Company for the revising of their facilities to accommodate the State's construction, Construction Program Year 1959-60, Item Number 88. (April 25, 1963)

Claims-Recommendation

10. This claim arises out of damage to traffic signal cable located at Route 18 and Milltown Road, E. Brunswick Township, New Jersey. This cable was damaged at some unknown time prior to October 25, 1962, but discovery of the damage did not occur until that date. Upon discovery of the damage a billing was prepared against the Central Construction Company to cover cost of repair and replacement. This billing was predicated upon the theory that Central Construction Company, which has been doing digging in the area, was responsible for the damage. After a number of conferences with representatives of Central Construction Company and on site investigation, the Claims Bureau has concluded that it is unlikely that a verdict could be obtained against Central Construction Company who refuses to acknowledge responsibility. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that this claim against Central Construction Company in the amount of $175.26 be cancelled rather than incur additional expense in what would probably be a futile attempt to recover it through court proceedings. (April 25, 1963)

23. Presented herewith is a request from the Department of Law and Public Safety to approve a voucher to authorize the $2,700.00 final payment for the acquisition of Lot 6 of Block 10, Logan Township, Gloucester County, consisting of approximately 2 acres, from Dino and Dora Ferretti. A down payment of $300 has previously been made on the $3,000 purchase price. This acquisition is to enlarge the present maintenance facilities of the Bridgeport Yard. Claims-Public Service Elec. & Gas Co., Rt. 22, Sec. 3

24. The attached is pertinent material pertaining to a claim for pole relocation on Route 22, Section 3 by the Public Service Electric & Gas Company. The claim originates from the fact that after having made an original relocation in accordance with our request, a change of plan occurred on Route 202, Section 3. This change of plan required that this pole be relocated a second time. It is the cost of this second relocation which is covered by the above claim. It is recommended that since this move was required because of our belated action, this claim be approved. Funds are available from Account No. 610-100-459 - "Maintenance by Agreement and Contract." (April 30, 1963)

NO. 14 - 1963

Subject voucher represents a 10% down-payment on the $3735.00 purchase price of 2½ acres in Wall Township, Monmouth County. This property is being purchased for a new maintenance yard to replace the one taken by road improvements at Route 34 at the Brielle Circle. It is requested that approval be given for making the subject down-payment. (April 30, 1963)

Detours-Route 80, Section 5N

26. When the original detour was set up for Route 80, Section 5-N, Pleasant View Avenue in the City of Hackensack, Bergen County, was inadvertently omitted. It was necessary for traffic to use this street to get around the construction project. The pavement on this street has been adversely affected due to the increased volume of traffic. In order to patch and restore this street to its former condition it is estimated the cost will amount to approximately $3,500.00. It is recommended that this street be officially adopted and added to the original detour and that authority be given to set up the above amount for necessary repairs. (April 30, 1963)

Claims-Cancellation

16. This claim arises out of an accident occurring on January 2, 1963 involving a vehicle owned by the New Jersey State Highway Department, operated at the time by William J. Marren (now retired), and a vehicle owned by the Associated Transport, Inc., operated by James W. Burr. The accident occurred when the Associated Transport vehicle attempted to pass the Highway truck as it was proceeding in a northerly direction along Route 130 near Bridgeboro Road, Delran Township. Our version of the accident is that the Associated Transport vehicle when overtaking our vehicle came too close and struck the left hand rear view mirror and damaged the left front door. Repairs were made to the Highway vehicle at a cost of $150.30 and when we presented our bill to the Associated Transport, they replied that they would not make any payment for our damages as they had a signed statement from our driver accepting entire responsibility for the accident. It is the contention of the driver for the Associated Transport that as he was passing our vehicle, the Highway truck veered over to its left and the rear view mirror struck the right hand corner of the passing trailer. A representative of the Claims Bureau called at the Associated Transport office at which time they presented for his perusal, the printed statement which did have our employee's signature. It was Mr. Marren's version that when he signed this report, he thought he was giving the other driver his name, address and driver's license number and was not signing a statement admiting liability. At the completion of the discussion, we indicated that we could not accept a complete turndown as we could not accept their driver's version and discount the version of our driver. Subsequent negotiations by the Claims Bureau has now resulted in the Associated Transport agreeing to reimburse the State for 50% of its damage. In view of the different versions surrounding this accident, also the fact that our employee has now retired, we feel that the best interest of the State would be served by accepting the offer of settlement rather than expend additional time and money by instituting a suit with the possibility of receiving an adverse verdict. It is therefore our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack, that the offer of 50% be accepted and the balance of the claim be cancelled. (May 16, 1963)

It is further recommended that Regulation RP-62-41, adopted 10-21-62, and approved 10-31-62, be rescinded. (May 16, 1963)

No Parking Zones

18. In accordance with the provisions of Section 78, Chapter 23, Public Laws 1951 (c. 39:4-138.1), it is recommended that the attached regulation be adopted establishing "no parking" zones where parking is prohibited at all times and in accordance with the provisions of N.J.S.A. 39:4-199 permission is hereby granted to erect appropriate signs for designated bus stops along Route 23, Riverdale Borough, Morris County. Offices - Rental

13. Subject: Rental of space at Suburban Square Shopping Center. There is presented letter from Mr. Earl L. Cahan, Secretary, Suburban Square, Inc., quoting price for rental of 5,580 square feet in the Suburban Square Building on Parkway Avenue at Scotch Road, Ewing Township, Trenton, New Jersey. The purpose of the removal of sections of the Bureau of Planning and Traffic to the Suburban Square Building is to provide space on the second floor of the Highway Building for offices of the Right of Way Division, whose present first floor location will be used to accommodate the 1401 Computer System, to be installed in October 1963. Authority is requested to submit the matter of entering into a lease to the Department of Purchase and Property. (May 23, 1963)

Services - Engineering

14. As a result of comments made at the public hearing, it is considered desirable to extend the Consultant's work on Route 35 in a southerly direction for approximately 1½ miles to the Brielle Circle. This work is to be included in the existing Agreement with Porter, Urquhart, McCreary and O'Brien dated January 8, 1959. It is recommended that $33,000.00 be added to the present ceiling to cover the cost of this extra work. The ceiling for this project would increase to $251,010.00. (May 28, 1963)

- - - - - - - - - -

15. After the public hearing was held on the relocation and improvement of Route 69 and U.S. 202 between the fair grounds north of Flemington and Ringoes, the Consultant was advised to prepare plans for the "M" line, as approved. Subsequent to this he was instructed to prepare new plans along the "A" line. The cost of this revision amounted to $26,900.00. In addition to this, a revision in the typical cross section south of Larison's Corner will cost an estimated $5,000.00. In view of the aforementioned, it is recommended that the ceiling in our Agreement, dated March 26, 1959 with Porter, O'Brien and Armstrong, be raised $30,000.00 to cover the extra work. This will increase the existing ceiling of $133,100.00 to $163,000.00. (May 28, 1963)

Claims - Settlements

16. The above claim arises out of an accident occurring on December 27, 1962 when a Case 50 Power Loader which had been hired by our Department from the above named contractor and while being operated by one of our employees was damaged. The loader in question sustained extensive damage when it toppled down a steep embankment at a location where Route 80 overpasses Route 46 in Denville, New Jersey. An estimate covering the cost of making necessary repairs was submitted by the contractor in the amount of $1,040.00. The Bureau of Claims processed this claim in order to determine that the damages being claimed had actually occurred while the loader was in our care, custody and control; and that the figure of $1,040.00 was fair and reasonable. Mr. Larry Lore, Foreman for Equipment Operations of our Department made an inspection of the damaged equipment and reported that the sum of $1,040.00 was a very fair and reasonable repair figure for the amount of damages involved. The Claims Bureau, at our direction, presented this claim to the Legislative Budget and Finance Director in an effort to have it considered by this year's sub-committee on claims. The Bureau of Claims was recently advised that the sub-committee on claims had completed their business for this year and that another meeting would not be held until February or March of 1964. Giving due consideration to the circumstances under which this claim arose and the fact that there was no negligence on the part of the claimant, it is my recommendation that the claim of Emmans and Emmans in the amount of $1,040.00 receive favorable consideration and be paid at this time rather than have the contractor wait until May or June of next year for reimbursement of his loss. (May 27, 1963)

Accounting - Claims (Settlements)

6. Peter Strand, a laborer in the Maintenance Division of the State Highway Department, suffered personal injuries in a third party accident occurring on April 6, 1961, involving a vehicle owned and operated by William MacDonald, 5 Park Place, Newfoundland, Canada. As the result of said accident, the State Highway Department was required to expend the sum of $4,933.16 by way of medical treatment and temporary and permanent compensation payments. A suit was instituted against the third party by Mr. Strand's attorney and the trial of said suit has now been listed for Monday, June 10, 1963. I am attaching hereto a letter received from Mr. Strand's attorney which is self-explanatory with reference to the insurance coverage on the vehicle involved, as well as the circumstances surrounding the accident. In view of the limited coverage, as well as the other questionable aspects of this case as outlined in Mr. Turak's letter, it is our opinion that the offer of $1,666.67 net to the State should be accepted and it is our recommendation and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General Philip A. Donnelly that the offer receive favorable consideration. I might add that in the event the coverage was sufficient to enable us to recover the full amount of our lien, the State would receive the sum of $3,126.77 after allowing the statutory deductions for counsel fees and expenses of suit. Therefore, the amount we have been asked to compromise between a full settlement, less statutory deductions, and the amount of the proposed offer of settlement is $1,460.10. (June 12, 1963)

The Authority was required to photograph and carry out engineering inspections and investigations to determine the structural condition of their trunk sewer to determine the possible effect the State's construction would have on their facility.

(Cont. next page)

(Cont.) The actual cost of this work amounted to $4,110.12 or 77.4% over the original estimate. This increase was due to the fact that this inspection was the first of this type and there was no basis for preparing an estimate and the cost was estimated to low. Also, due to a high flow in the sewer at the time there was a considerable waiting period to accomplish the work. In view of these facts it is recommended that an additional amount of $1,810.12 be set up to cover this work. Construction Program Year 1959-60, Item #20. (June 19, 1963)

2. It is recommended that the attached project agreement in duplicate be approved and executed for Utility P/E and Utility Construction: Route 69 & 202, From the Third Neshanic River to Flemington Traffic Circle, Hunterdon County, Project No. F-83(15). The amount of Federal-aid Primary funds obligated is $3,337.50 which is 50% of the estimated cost for Federal participation. This project agreement is necessary for utility adjustments and/or rearrangements required for the subject project. (Aug 12, 1963)

It is recommended that the attached modified project agreement in duplicate be executed for Utilities: Route I-80 Section 4, from Passaic River to Garden State Parkway, Bergen and Passaic Counties, Project No. I-80-4(5)53. Claims-Settlements

4. The State Highway Department has two claims arising out of accidents occurring at the Victory Bridge on May 2, 1962 and January 17, 1963, involving tugs owned by McAllister Brothers, Inc. As the result of said accidents, the fender system at the Victory Bridge was damaged and had to be repaired for $673.92 covering the May accident and $1,065.00 covering the January 1963 accident. Upon presenting the Towing Company with bills covering the State's charges, we received an offer of settlement in the amount of 75% of our total claim. This offer was rejected and subsequent negotiations by the Claims Bureau has now resulted in the Towing Company offering the sum of $1,650.00 in full settlement of our two claims totaling $1,738.92. Inasmuch as our bills did not reflect depreciation on the material used, this office agreed to allow the sum of $88.92 towards the depreciation. It is our feeling that the settlement figure of $1,650.00 represents a fair and reasonable settlement and it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack that it be approved and the balance of $88.92 which we allowed for depreciation be cancelled. (Aug 15, 1963)

6. DeLeuw, Cather & Brill has completed all work for Route 78, Section 4 in accordance with the terms of the Agreement dated February 25, 1958. Right of Way-Route 80 ✓

103. Heretofore, the Commissioner had given authority to condemn Parcels 24A & 24B, on Route 80, Section 5K, Project I-80-5-(12), from New Jersey & New York Railroad (Erie) at Hackensack to Hackensack River, Pension Envelope Corporation, since the owners demanded $300,000.00 which was considered excessive. It was the intention at that time to acquire an additional Parcel UE24C, which was required for the relocation of a railroad spur. However, the property owner informed our Legal Department that he would oppose any application to condemn for the UE Parcel on the grounds that the Commissioner has no power to condemn private property for other private uses. Due to the urgency of our construction program, it is necessary to acquire the former UE24C parcel as Parcel 24C in fee simple. It is recommended that authority be granted granted to institute condemnation proceedings for the acquisition of the parcel in fee simple. Appraisals for Parcel 24C will be secured immediately and an offer made. (September 12, 1963)

The debtor at the time of the accident did not carry property damage insurance on his vehicle and promised to liquidate the claim by making $5.00 weekly installment payments. The claim was reduced to the sum of $48.13 by this method, but no further payment was made since May 19, 1961. A personal call was recently made upon this debtor by a representative of the Claims Bureau which resulted in Mr. Bell offering the sum of $35.00 in full settlement of the unpaid balance, which offer was tentatively accepted by the Claims Bureau subject to approval by the Highway Department. Giving due consideration to the cost involved in attempting to collect this claim on the installment basis, which possibly could include the necessity of making additional personal calls on the debtor to recover the unpaid balance, we feel that the offer of $35.00 in full settlement of the balance of $48.13 should be accepted and it is recommended that the offer receive favorable consideration in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorny General, William J. McCormack. (September 18, 1963)

There is presented again the matter of acquisition of property on Route 10 (1953), Section 3, Tabor Road to Troy Hills Road, Whippany, on which condemnation proceedings were previously authorized for Parcels 64A, 64B and 64C, Mauritius Jensen. Subsequently, Mr. Jensen sold his property to the First National Bank of Whippany from whom we are acquiring Parcel 63. The Bank desires to retain Parcels 64A and 64C. Since these parcels are not actually required for highway construction they were eliminated. Negotiations were conducted with the First National Bank of Whippany for Parcels 63 and 64B only and their demand of $45,000.00 is considered excessive. It is recommended that authority be granted to institute condemnation proceedings for Parcels 63 and 64B and that condemnation proceedings authorized on April 25, 1963 for Parcels 64A, 64B and 64C be rescinded. (September 30, 1963) Commissioner Palmer adopted a regulation relative to records which are public records within the meaning of Chapter 73, P.L. 1963 pursuant to the provisions of Executive Order No. 9 issued by Governor Richard J. Hughes.

STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT
TRENTON

SCHEDULE OF APPROVALS - OCTOBER 7, 1963

Administration Items

Claims-Settlements

1. The State Highway Department has a claim arising out of an accident occurring on May 13, 1961 on the Raymond Boulevard Route #1 Ramp, Newark, New Jersey, involving a vehicle owned by Shein's Express, being operated by George Colligan. As the result of said accident, the tractor-trailer in attempting to negotiate the curve, jumped the curb and damaged the guard railing which had to be replaced at a cost of $319.48, to which a department overhead of $31.95 was added, making a total claim of $351.43. Upon presenting a bill to the owner of the vehicle involved, they refused to make payment on the grounds that there was no liability on the part of their operator, and it was their opinion that the curve was entirely too sharp for trucks of this type to negotiate. This office did not accept this explanation and continued to pursue the collection of the claim but without success. A District Court Action was therefore instituted in the Mercer County District Court by the Claims Bureau which resulted in the attorney representing the defendant, offering the sum of $100 in full settlement of our claim, which offer was rejected. A second offer of $175 was made and also rejected. Subsequent negotiations by the Claims Bureau has now resulted in an offer of $200 being made in an effort to eliminate the necessity of actually trying this case. In the event we had to try this case in order to collect the full amount of our bill, it would be necessary to bring the police officer who investigated this accident from Newark and also utilize the services of certain members of the State Highway Department. Giving due consideration to the expense involved, as well as the time consumed by our witnesses, we feel the offer of $200 should receive favorable consideration as it would undoubtedly cost us more than the amount we have been asked to waive to try this case and obtain a judgment. It is therefore our recommendation that the offer of settlement be approved and the balance of the claim cancelled in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General, William J. McCormack.(Oct. 1, 1963)

Claims-Cancelled

2. The State Highway Department is presently carrying a claim against the Seventh Day Adventists in the amount of $485.23 arising out of an accident occurring on November 11, 1962 involving State Highway Department vehicle bearing Reg. HYD 472, operated by John Pasterchik and a bus owned by the Seventh Day Adventists, operated by Thomas Foulkes, Jr. The insurance company for the other party involved refused to honor our claim on the grounds that the State driver was the proximate cause of the accident. It was further pointed out to this office that the Seventh Day Adventists also had a claim in the amount of $731.78 arising out of this accident. Inasmuch as, the State's insurance carrier refused to pay for the damage sustained by the bus, their claim was referred to arbitration, inasmuch as, both carriers were members of the Arbitration Board. At the conclusion of the hearing, a verdict was rendered in favor of the Seventh Day Adventists and the State's insurance company was required to pay the full amount of their claim amounting to $731.78. When a case is heard by the Arbitration Board, the verdict is always for the full amount or for nothing. These claims are never settled on a compromised basis. In view of the circumstances under which the accident occurred and giving due consideration to the decision rendered by the Arbitration Board, we do not feel that further action should be taken to enforce payment of the State's claim. It should be pointed out that the bus was traveling on a through State Highway and the Highway vehicle was crossing the intersection emerging from a secondary road. In view of the foregoing, it is our recommendation that this claim be cancelled in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General, William J. McCormack. (Oct 1, 1963)

Services-Engineering

3. It is recommended that additional funds of $1,665 be set up in the Agreement with Porter, O'Brien & Armstrong dated January 5, 1960 for engineering services relative to Route U.S. 1 in Woodbridge, Grade Separation. These additional funds are necessary to cover extra work performed by the Consultant. The extra work requested was for a preparation of a utility rearrangement plan, revision to the right-of-way maps and corrections and revisions of quantities to the pavement section. The ceiling will be increased from $85,000 to $86,665 with this addition. (Oct 2, 1963)

- - - - - - - - - - -

4. Approval and execution is recommended of the attached Agreement dated September 18, 1963 between Sverdrup & Parcel, Consultant and the State of New Jersey covering understandings in connection with the State Highway design for Route I-280 between Pleasant Valley Way, West Orange and the Orange - East Orange line where their is a controversy as to the open cut versus tunnel. By this agreement the Consultant is to be paid for reviewing the feasibility of constructing a tunnel vs. the present proposed open cut, which means that the Consultant is to be paid for services plus materials for submitting reports based upon receipts submitted for a manifest total of $22,000.00, except in the event the State orders additional work to be performed which would require over the ceiling pay varying more than 10% of $22,000.00. It is therefore recommended that an amount of $22,000 plus 10% or $24,200.00 be set up. (Oct 1, 1963)

- - - - - - - - - - -

5. In connection with the Agreement with Goodkind & O'Dea dated February 6, 1958 for Engineering Services relative to Route 287, it is recommended that the retained percentage for this contract be reduced from 10% to 5%. This contract was devided into four projects, 3 of which are advertised and one is to be advertised in the near future. The estimated construction cost will be close to the $10,000,000 working estimate, and there is no reason why we should retain an additional 5%. (Oct 1, 1963)

Agreements-City of Rahway

6. Approval and execution is recommended of the attached Agreement dated September 25, 1963 between the City of Rahway and the State of New Jersey covering understandings in connection with the construction of drainage facilities contiguous to Route 27 and West Lake Avenue. The State is to share in the cost of this work with the City of Rahway in the exact amount of $2,000.00 and it is recommended that this amount be set up for payment to the City. (Oct 1, 1963)

Utilities-Route 80

7. Approval and execution is recommended of the attached Utility Order No. PUO-73-80-3E, NJ-I-80-3(9)53 Contract #2 issued to the New Jersey Bell Telephone Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Freeway Interstate Route 80 in the Townships of Parsippany-Troy Hills and Montville, Morris County. The Utility Company is to be reimbursed for the actual cost of the rearrangement work which including 10% for contingencies is estimated at $13,200.00. The current cost of this signal is now borne by the United States Government (Picatinny Arsenal). A change in Government regulations prohibits continued participation in this installation. The annual current costs estimated to be $300.00 annually must therefore be assumed by the New Jersey State Highway Department. It is respectfully requested that the Bureau of Electrical Operations be authorized to assume the electric current cost for the revised signal installation and to negotiate with the Public Service Electric and Gas Company for electric service. Condemnation proceedings were previously authorized for the acquisition of these parcels because of the owner's excessive demand of $55,583. Our Title Search reveals that Parcel 12A1 (vacant land) is affected by a lease held by the United States of America. Since we cannot, under the law, make the United States Government a party to condemnation proceedings, authority is requested to condemn these parcels, subject to the lease of the United States of America. Right of Way-Route 295

93. There is presented again the matter of acquisition of property on Route FAI 108-2-(5) also known as 295-2-(5), Warwick Road to Route 73. An agreement was previously approved in the sum of $175.00 with John Holzer, Sr. and wife covering Parcel 184 (436 sq. ft.) Subsequently, there was a revision in the plan and the area now required from the Holzer property is only 360 sq. ft. which revised parcel is now designated as Parcel R184. The change in area is too small to affect the value of the taking. It is therefore recommended that the agreement covering Parcel 184 be rescinded; that authority be granted to accept a Deed covering Parcel R 184; and that the sum of $175 be paid therefor. (Oct 15, 1963)

The Approvals as indicated in this Schedule are hereby ratified and confirmed.

6. This action rescinds the action dated Penn-Jersey Transportation Study January 10, 1962 on the subject of Excess Sample of the External Cordon of the Penn-Jersey Transportation Study in the amount of $49,597.20 not chargeable to the Penn-Jersey Transportation Study and proposes the following actions:

In the preparation, collection and processing of the external cordon line survey of the Penn-Jersey Transportation Study, the size of the interview sample was based on a minimum of 20% of the peak hour for each station. The Highway Departments of Pennsylvania and New Jersey, through their respective planning staffs, assigned to the committees of the Penn-Jersey Study, agreed on this size sample. For 20% of all interviews were to be used in the Penn-Jersey Transportion indirect analysis, it was decided by the states that cost of the excess samples above the 20% would be allocated to the Highway Departments of Pennsylvania and New Jersey, as they benefited individually, and would not be a direct cost to the Study. This excess sample was requested by the states individually for further analysis of area problems, projections and future traffic assignments and other special planning studies. The allocable cost to New Jersey of the additional interviews for the Excess Sample of the External Cordon is $49,597.20, which has been paid by the State of Pennsylvania.

(cont'd)

(cont'd)
None of this additional cost is reimburseable to either state by any other outside agency, thereby representing 100% State monies involved in the cost. In the disbursement by New Jersey of $100,000.00 of 100% state money to subsidize the Delaware River Ferry Company for the period December 1, 1961 to December 31, 1962, New Jersey has paid both New Jersey's and Pennsylvania's share, again, none of which is reimburseable to either state by any outside agency. It is, therefore, recommended that Pennsylvania's invoice to New Jersey for our portion of the Cordon Line Study be withheld from payment and used as an offset against the amounts paid by New Jersey to the above named Ferry Company on behalf of Pennsylvania, resulting in a net expenditure of $50,402.80 by New Jersey and $49,597.20 by Pennsylvania for ferry subsidation. (October 28, 1963)

This project will use 100% Federal Aid monies. New Jersey's share will be $30,000.00. Federal approval for this project will be addressed to Mr. Rex M. Whitton, Federal Highway Administrator, Washington, D.C. (October 30, 1963)

All the above toward a manifest ceiling of $40,000.00. If the Consultant is directed in writing to perform extra repayable items, the same would be above and beyond the $40,000.00 figure. It is recommended that the sum of $50,000.00 be set up to cover contingencies and all extra repayable items, if any. (October 23, 1963)

11. It is recommended that the estimate of construction costs for Route 24 Freeway, Springfield Avenue Interchange, presently stipulated in our agreement with Howard, Needles, Tammen & Bergendoff dated August 17, 1961, be revised from $1,879,000.00 to $2,875,000.00. The Consultant has recently made an estimate of cost which is a more realistic figure which has been confirmed by our staff. (October 25, 1963)

- - - - - - - - - -

12. It is recommended that $4,000.00 additional funds be set up in the Agreement with John G. Reutter Associates dated October 22, 1960 relative to Route U.S. 130, to cover extra work performed under this contract. The extra work consisted of detailed plan preparation and surveys which became necessary because the exact location of utilities in the area was unknown. This addition will increase the present ceiling figure of $136,005.42 to $140,005.42. (October 25, 1963)

- - - - - - - - - -

This increase in scope is necessary to accommodate the projected opening of the Narrows Bridge. The extra work will include photogrammetric maps, field surveys, electronic computer, boring inspectors, printing, reporduction and engineering salaries. It is estimated that this work will cost approximately $70,000.00. It is recommended that the ceiling on this contract be increased by this amount and that separate time charges should be made against this additional work, in the event it may be desirable to deduct this amount from any future agreement covering the same area. When this Agreement was consummated, the estimate of construction costs was $2,000,000.00 and engineering funds were appropriated based on this amount. During the course of the work, additions and more liberal designs were provided which have raised the estimated cost of this project to $3,400,000.00. The consultant's work has also increased and the increase in funds will be sufficient to close the project. (November 8, 1963)

4. It is recommended that an additional $33,500.00 be set up to cover additional work requested in connection with our agreement with Howard, Needles, Tammen & Bergendoff dated 12-22-61. It is also recommended that an additional $6,000.00 be added to the extra work for borings and boring supervision provided in this contract. When the original agreement was prepared in December 1961, the estimated construction cost was $2,635,000.00. The scope of the work has been increased so drastically that the estimate of construction cost is now approximately $5,500,000.00. Additional funds are required because: it was contemplated that this project would be advertised under a single contract; it has actually been divided into four separate contracts which has required more time for preparation; the general Property Parcel Maps submitted were prepared in accordance with the existing tax records and deeds in the County Court House; a complete new set of right-of-way agreements were requested to reflect the State's contention that all lands now or formerly under tidewater are State lands. The extent of the project has been increased considerably on the southeast and with additional ramps added in the area south of Route 3 opposite the New York Authority "park and ride" lot. Two additional ramps have been added in the vicinity of the Howard Johnson Motel. The soils stabilization treatment was increased which only became known after extensive sub-surface investigation and analysis. The boring contract for this project has required considerable more supervision and investigation than could be anticipated. There was an increase in estimated time to prepare the signing (contd.)

(contd.) contract which includes 13 sign bridges. Two of the sign bridges are located beyond the limits of other work on the project. The firm prepared a complete lighting contract as extra work which was authorized by letter of December 11, 1962. Overtime was authorized by the State on the project to complete plans sooner and utility work at New York, Susquehanna Railroad was added which was not previously reflected in the contract. Additional work has been authorized to provide access to Peterson's Lane. The ceiling on this contract will now be $231,000.00 which sum includes $13,000.00 additional for the lighting contract. $18,000.00 is required for the extra work clause or a total of $252,500.00. (November 8, 1963)

Subsequently, a slight change was made in the curve of the radius across the corner of the Miller property; and the parcel now required is designated as Parcel R-2. The revision was so slight as not to affect the area of the taking and therefore would not affect the appraised valuations previously indicated. NO. 41 - 1963

STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT
TRENTON

Schedule of Approvals - December 9, 1963

Administration Items

1. It is recommended that the attached signatures of officials of this Department be certified to the Bureau of Public Roads in connection with 1954 Federal Aid Secondary Road Plan. (December 4, 1963.

Federal Aid-Signatures (Secondary)

2. The State Highway Department is carrying a claim against Louis J. Zack and Hess Oil & Chemical Company in the amount of $823.37 arising out of an accident occurring on May 20, 1963 on U.S. Highway 22, Reading Township, Hunterdon County. On the date in question, a vehicle owned and operated by Louis J. Zack was proceeding in an easterly direction along U.S. Highway 22 and for some unknown reason, it crossed the grass dividing island and collided with a tractor-trailer owned by Hess Oil & Chemical Company which at the moment of impact was proceeding in a westerly direction on U.S. Highway 22. As the result of the collision, the tractor-trailer upset and considerable amount of oil spilled on the grass area which had to be removed and approximately 5000 s.f. of grass was damaged and had to be replaced with new top soil and seed. The insurance carrier representing Louis J. Zack has informed this office that three claims have been filed arising out of this accident; one by the Hess Oil & Chemical Company in the amount of $5,032.64, one by Mr. Mueller in the amount of $595.00, and one by the State of New Jersey in the amount of $823.37. Inasmuch as these three claims exceed the property damage coverage which in this case amounts to $5,000.00, the insurance company has pro-rated all three claims whereby, Hess Oil will receive $3,090.66, the State of New Jersey $638.17, and Mr. Mueller $461.16. The insurance company has indicated that Mr. Zack is not a home owner and has no assets of his own. At the time of the accident, he was earning between $80.00 and $90.00 per week but has since lost his job and is now residing in Pennsylvania. Inasmuch as the other two claimants have agreed to accept the above-mentioned sums in full settlement of their claims, it is our feeling that the best interest of the State of New Jersey would be served if we accepted the sum of $638.17 in full settlement of the State Highway Department's claim. It is therefore, our recommendation and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that the insurance carrier's offer of $638.17 receive favorable consideration. (December 6, 1963)

61. There is presented a report concerning the matter of a relocation payment for Mrs. Dore Bernstein (Dore Anne Sport Shop), tenant of Parcel 175, on Route 78, Section 5A, Project I-78-5-(11), for which the Commissioner previously approved a Right of Way Agreement. Mrs. Bernstein (Dore Anna Sport Shop) moved from the premises on June 1, 1963, and thereafter submitted a paid bill in the amount of $1,060. to cover the relocation cost. On investigating our records, it was found that Mrs. Bernstein had not been properly notified that she would be eligible for relocation payment, nor had she been informed as to the procedures to follow. Futher investigation reveals that the cost of $1,060.00 is fair and reasonable. Authority is requested to make payment to the tenant on the basis of the receipted bill and the amounted relocation certification in the sum of $1,060.00. (December 5, 1963)

Right of Way-Route U.S. 130 (1953)

65. There is presented again the matter of condemnation of lands on Route U.S. 130 (1953), Section 10, Project U-69-(23), Columbus Road, Burlington to Cooperstown Road. Condemnation proceedings were previously authorized for the acquisition of Parcel 100, Frank Travea, Jr. & wife. We were subsequently advised that a portion of Parcel 100 was actually owned by the City of Burlington, necessitating the subdivision of the parcel to 100A, Frank Travea, Jr. & wife; and 100B, City of Burlington. Then the City of Burlington deeded Parcel 100B to Frank Travea, Jr. & Wife. The total area of original Parcel 100 was 1,920 s.f. and a slight revision in the map resulted in an area of 1,870 s.f. for revised Parcel R100A & R100B, both parcels being now owned by Frank Travea, Jr. & Wife for which the owners are still demanding the sum of $3,000.00, which is considered excessive. It is therefore recommended that the previous action authorizing condemnation for Parcel 100 be rescinded and that authority be granted to institute condemnation proceedings for the acquisition of Parcels R100A & R100B (Frank Travea, Jr. & Wife) in fee simple, subject to any public utilities existing in the premises. STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT

SCHEDULE OF APPROVALS - DECEMBER 31, 1963

Administration Items

Federal Aid-Urban Funds
Route 29, Trenton

1. It is recommended that the attached modified project agreement in duplicate be approved and executed for right of way: New Jersey Route 29, Calhoun Street to Willow Street, Trenton. Project U-198(12). The amount of Federal Aid Urban Funds obligated is $430,000.00 which is 50% of the estimated cost of $860,000.00. (Dec 30, 1963)

Federal Aid-Urban Funds

2. It is recommended that the attached modified project agreement in duplicate be approved and executed for right of way; Route 295 from New Jersey Route 72 to Marne Highway, Burlington County, Project Number I-295-2(6)37. The amount of Federal Aid Urban Funds obligated is $1,147,500.00 which is 90% of the estimated cost of $1,275,000.00. (Dec 27, 1963)

3. The Policy Committe and Executive Committee of the Penn-Jersey Transportation Study have determined and recommended that the budget of $4,423,000.00, as previously approved by supplemental agreement of September 18, 1962, be increased to $4,918,282.00 to complete the work outlined and described in the 1963-1964 Prospectus Supplement, dated September 1963. The share of the increased cost for the New Jersey State Highway Department is $89,150.76, which is 18% of the total increase. Highway Planning Survey Funds will permit participation by the Bureau of Public Roads. Approval and execution is recommended of the attached Supplementary Agreement, between the Commonwealth of Pennsylvania and the State of New Jersey, providing the necessary funds for a revised budget to satisfactorily complete the work called for in the 1963-1964 Prospectus Supplement of the Penn-Jersey Transportation Study. (Dec 20, 1963)

Agreements-Penn-Jersey Transportation Study

4. Approval and execution of the attached Agreement, dated December 11, 1963, between Goodkind & O'Dea, Inc., and the State of New Jersey, covering understandings in connection with the performance of an engineering study and report on the best location for constructing about 7.2 miles of State Highway I-287, from the vicinity of Montville, Morris County, (Route 202) as far as the Paterson-Hamburg Turnpike in Passaic County. The Consultant is to be paid as follows:

1. A monthly part payment less 5% retainage for the portion completed to date toward a lump sum fee of $77,500.00, for nine payments.
2. A final number 10 payment which shall include the retained fee plus the remainder of payment due for the completed work.
3. It is recommended that $7,750.00 be added for contingencies, making a total amount to be set up under this Agreement, $85,250.00. (Dec 17, 1963)

Services-Engineering

5. Goodkind & O'Dea have a contract with our Department to undertake measurements and complete "As Built Plans" for three construction contracts on Route 287; namely, I-287-3(6), I-287-3(9), and I-287-3(10). Consultant has completed all work on I-287-3(9) and has submitted invoice for the amounts due, including retainage, on this particular job. The contract as written, however, does not permit the payment of retainage until all work included in the contract has been completed. This obviously imposes a hardship on the Consultant. It is therefore recommended that the State Highway Commissioner authorize the payment of the full amount due, including retained percentage, for the part completed, comprising I-287-3(9). (Dec 30, 1963)

- - - - - - - - - - -

6. Approval and execution is recommended of the attached Agreement, dated December 10, 1963, between Parsons, Brinckerhoff, Quade and Douglas, Consultant, and the State of New Jersey, covering understandings in connection with the performance of engineering services relative to a route study for a new highway beginning at Albany Avenue (Black Horse Pike), in the vicinity of Great Island, Atlantic City, southeastwardly to the westerly end of Dorset Boulevard in Ventnor City, Atlantic County.

(Continued on next page)

The Consultant is to be paid on the following basis:

1. A monthly part payment based upon the State approved hourly pay rates of employees' time multiplied by 2.25 for oroductive straight time.
2. A monthly payment for State-approved overtime at an added premium of 1/2 times straight time rates.
3. A monthly repayment for all reproductions submitted to the State, excluding only those used by the Consultant in the performance of the subject services.
4. A monthly repayment for air photographs after check and audit by the State of receipts from suppliers to the Consultant.
5. Car mileage at 10 cents per mile accumulated in pertinent work production with personnel vehicles exclusive of commutation.
6. Repayment of necessary travel expenses by other forms of locomotion.
7. Repayment of necessary work items, long distance telephone calls.
8. A final payment for unpaid services, if any, at the time of acceptance of all work specified above; the sum total of all payments not to exceed $12,000.00.
9. It is recommended that $1,200.00 be added for contingencies, making a total amount to be set up under this Agreement, $13,200.00. (Dec 19, 1963)

Claims-Settlements

7. This claim arises out of an automobile accident which occurred at the intersection of Route #130 and Marlton Pike, Pennsauken Township, New Jersey, and involved vehicles owned by Kenneth R. Harring and Charles D. Schuewker. As the result of this accident, traffic signal equipment was damaged and subsequently repaired at a cost of $234.38. Salvage and depreciation in the amount of $23.80 was allowed which reduced the claim to a net amount of $210.58. Investigation by the Claims Bureau disclosed that the Schuewker vehicle was insured and his insurance company has made an offer of 50% of our damages on the grounds that this was an intersectional accident and there is considerable discrepancy in the reports as to which vehicle actually passed the red light. The Harring vehicle, however, which was operated by a friend of the owner, was uninsured. Numerous letters have been written to Mr. Harring and several personal calls have been made in an attempt to locate him. It is known that Mr. Harring left New Jersey with the intention of going to New York State, but correspondence with the New York State Division of Motor Vehicles disclosed that he has not taken out a New York State driver's license. Prior to his leaving New Jersey, however, he did indicate that his driver did not pass the red light and he therefore would not make a contribution to the settlement of this claim. In view of the fact that we have been unable to locate Mr. Harring since he left New Jersey, it would be impossible to serve him in the event a suit were instituted against both parties involved in this accident. Giving due consideration to the circumstances under which the accident occurred and the fact that the insurance carrier representing Mr. Schuewker is willing to reimburse the Highway Department for 50% of the claim, it is our recommendation, in accordance with Mr. Levine's memorandum, attached herto, and recommendation of the Deputy Attorney General, William J. McCormack, that the offer of settlement receive favorable consideration. (Dec 24, 1963)

8. This claim arises out of damage to Highway guard railing located at Route 1 approximately 150 feet north of the Garden State Parkway in the Township of Edison, New Jersey. This guard railing was damaged by a motor vehicle owned by Stanley L. and Joseph Zimny, individually and trading as Zimny's Trucking Company. It was operated by Stanley L. Zimny. After all other methods of collection had failed, suit was instituted in order to recover the amount of the Highway Department's claim. An offer has now been received, which offer is to compromise the claim of the State Highway Department for $450.00. This offer has been given consideration since it is felt that successful prosecution of the pending law suit is questionalbe in the light of the factual situation. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Stanley L. and Joseph Zimny, individually and trading as Zimny's Trucking Company, in the amount of $553.10 be settled by the payment of $450.00 by the defendants rather than incur additional expense and subject a total claim to uncertain recovery through court proceedings. (Dec 27, 1963)

9. This claim arised out of an automobile accident which occurred on January 1, 1958 at the intersection of Main Street and Route 130, Washington Township, New Jersey involving a vehicle owned by Anna T. Raeter and operated by Harry Pullen, resulting in damages to State Highway Department owned guard rails, which were repaired at a cost of $151.98. The insurance carrier for the owner of the vehicle involved turned down our claim on the basis that there was no coverage, inasmuch as the driver involved was operating the Vehicle without the permission of the owner.

(Continued next page)

(Continued) The driver involved was convicted of drunken driving as a result of the accident in question and was committed to jail because of his inability to pay a fine. Our file indicates that the insurance carrier involved had good grounds for disclaiming any coverage and that the driver involved is irresponsible and judgment proof. Recent negotiations between the Claims Bureau and the insurance company involved have resulted in a 50% offer of settlement of our claim. In view of the foregoing and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General William McCormack it is my opinion that the State would be justified in accepting this 50% offer namely, $75.99 and that the balance be cancelled. 83. There is presented again the matter of acquisition of property on Route 35 (1953), Section 8, from Front Street to Leonardville Road, Parcel 6, Beatrice Maloney, (widow), on which an agreement was previously approved in the sum of $800. The plan upon which this agreement was based provided for the construction of an open ditch at about Station 145+30. Subsequently, our engineers indicated that this open ditch would not be required and our appraiser reviewed his report in light of this development. It was determined that this would not materially affect the valuation originally placed upon the parcel and the owner executed another agreement dated December 2, 1963 at the same consideration. It is recommended that the agreement dated December 2, 1963 in the sum of $800. be approved and that the previous agreement be rescinded. (Dec 30, 1963)

Subsequently, the owners indicated they wished to retain the dwelling and pool and negotiations were reopened; which resulted in the execution of an agreement in the sum of $18,650 including a down payment of $4,500 (owner to retain and remove dwelling and pool). It is recommended that this agreement in the sum of $18,650 be approved and the previous agreement in the sum of $20,650 be rescinded. (Dec 26, 1963)

87. There is presently a report concerning the matter of a relocation payment for Benjamin Manno, occupant of Parcel 74, on Route 78, Section 5A, Project I-78-5-(11), for which the Commissioner previously approved a Right of Way Agreement. Mr. Manno moved from the premises on July 29, 1963, and then submitted two moving estimates from George's Trucking and Moving Company in the amount of $187.00, and A & M Moving Company in the amount of $175.00. Later, he submitted a moving bill in the amount of $187.00. He did not comply with all departmental procedures, in that he failed to submit two estimates prior to his move. His reasons were due to his illness and confinement in the hospital prior to, and at the time of the relocation. The sum of $175.00, is reasonable for his relocation costs since, it is the lesser of the two bids sumbitted by the moving agents. Authority is requested to make payment to Mr. Benjamin Manno, on the basis of the approved estimate and the departmental Relocation Certification Claim Form in the amount of $175.00. (Dec 24, 1963)

Right of Way-Route 280 (1953)

89. There is presented again the matter of acquisition of property on Route 280 (1953), Section 6, Project I-280-6-(5), from Kenilworth Place to Roseville Avenue, Parcel 31, Anne Mittelsdorf Bowman, on w ich an agreement in the sum of $31,100 was previously approved. This agreement was executed by Anne Mittelsdorf Bowman as Executrix under the Last Will and Testament of Annie Mittelsdorf, deceased. A report from our Title Officer indicates that she cannot convey title as Executrix of the Estate because title is vested in her individually and is subject to her husband's curtesy interest. Attempts to secure a Deed in this manner have been unsuccessful because she and her husband are separated and neither she nor her attorney want to reveal her whereabouts to her husband. In view of this title complication, it is recommended that the agreement previously approved be rescinded; and authority granted to institute condemnation proceedings for the acquisition of this parcel in fee simple, subject to any public utilities existing in the premises. (Dec 27, 1963)

An appeal was previously authorized from a condemnation commissioners' award in the sum of $17,250. In preparation for the trial of appeal, the Attorneys for the State and the owner appeared before Judge Schalich in Camden. There followed a discussion during which the Attorney for the owner agreed to accept the award by Commissioners in the sum of $17,250 without interest. After a complete review of the case, it is deemed in the best interest of the State to approve the award. The Complaint was filed in this case on Dec. 21, 1961. The Commissioners made an award in the sum of $500 from which an immediate appeal was taken because of the time element although the formal authority to appeal was not previously placed on record. At the trial of appeal before a Judge and Jury, the testimony on behalf of the State was in the sum of $100. Mr. Apadula took the stand and attempted to explain his concept of the effect of the required easement. He was not represented by Counsel. The Jury returned a verdict in the sum of $250 on which interest was allowed from the date of entry, June 3, 1963 at 6% amounting to $7.52. This resulted in a total Judgment in the sum of $257.52. Utilities-Route 80, Borough of Lodi

8. Under Utility Agreement, approved by Commission Action dated April 8, 1963, with the Borough of Lodi sanitary sewer, an amount of $18,000.00 was set up to cover the work to be performed by the Borough to accommodate the construction of Freeway Interstate Route 80. Of this amount, $1,602.00 was paid out for engineering, leaving a balance of $16,398.00 for contract work. However, the actual cost of the contract work amounted to $22,055.90, which is an excess of $5,657.90 over the amount set up for the contract work. This excess was due to an increase in contract quantities, namely, quantities of rock in excess of that which was anticipated, and also a greater amount of select backfill was required. In view of the above, it is recommended that an additional amount of $5,657.90 be set up to cover the actual cost of the contract work under this amount, and that the invoice be paid directly to the Union Building and Construction Company. SCHEDULE OF APPROVALS - JANUARY 22, 1964

Administration Items

Federal Aid-Interstate Funds

1. It is recommended that the attached project agreement in duplicate be approved and executed for Construction. Route I-295, from Pedrickstown Road to Oldmans Creek Road and from High Hill Road to Rouue 322. Project I-295-1(28)8. The amount of Federal aid Interstate funds obligated is $2,576,016.00 which is 90% of the estimated cost for Federal participation. The work to be performed under this contract consists of grading a portion of Route 295; including wet excavation and backfill, the consolidation of embankments, the construction of two bridges, the construction of frainage structures; and other incidental work as provided in the contract. (Jan 15, 1964)

Claims-Cancellations

2. In accordance with the recommendation made by the Claims Bureau and William J. McCormack, Deputy Attorney General, and Cyrus Card, Comptroller for the State Highway Department, in connection with claims being carried against outside parties arising out of motor vehicle accidents, more fully set forth in the Schedule, attached hereto, it is hereby recommended tha the claims in question be cancelled for the reasons set forth in the memorandum prepared by the Claims Bureau dated December 13, 1963. The thirty claims recommended for cancellation and appearing on the attached Schedule total $6,312.75. (Jan 20, 1964)

- - - - - - - - - - -

3. This claim arises out of damage to Highway sign equipment located at Route 30 and 130, Pennsauken Township, New Jersey in the amount of $368.21. The damages were caused by vehicles owned by McLean Trucking Company and Russell Gibbs on March 17, 1962. Billings were prepared and presented to McLean Trucking Company and Russel Gibbs, but both refused to make any voluntary payment, each denying liability for the damage. McLean Trucking Company has now tendered an offer of $329.04 to relieve their company of liability. They have requested that a full release be given all parties on payment of the account. In view of the factual situation, the Claims Bureau has concluded that further action on this case by way of suit would be unwarranted. The offer tendered is $39.17 short of full payment to the department for its damage and acceptance of this offer would avoid the necessity for trial with a problematical outcome. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deptuty Attorney General Willaim J. McCormack that this claim against MeLean Trucking Company, Robert K. Gregg, its operator, and Russell Gibbs, be cancelled on the payment of $329.04. (Jan 16, 1964)

This agreement is to be financed by a Highway Planning Survey matched funds. 5. It is recommended that an additional $2,106.52 be set up in the Agreement with Grassman, Kreh & Mixer dated January 26, 1962 to cover additional work on the State Teachers' colleges at Trenton, Paterson and Union. The funds initially provided in this Agreement are not sufficient to cover the cost of the work involved. This contract is on a prorated sliding scale fee basis of contract award cost. The four contracts involved total $198,741.90, which total receives a fee assignment of 2.92% for each phase of the work. This totals $11,606.52. Since $9,500 was initially set up, the additional $2,106.52 is required to fulfill the payment clause in our Agreement. This amount does not take into account any extra work involved. Any additional monies for extra work will be set up on a separate commission action. (Jan 13, 1964)

Branco, et ux. Condemnation proceedings were previously authorized at which time the owner's demand of $30,000 was considered excessive. Continued negotiations have resulted in the execution of an agreement in the amount of $21,000. It is recommended that this agreement be approved, and that condemnation proceedings previously authorized be discontinued. (Jan 28, 1964)

Right of Way-Route U.S. 202 & 69

It is recommended that this agreement be approved and that condemnation proceedings previously authorized be discontinued. (Jan 28, 1964)

Right of Way-Route 280 (1953)

83. There is presented again the matter of acquisition of property on Route 280 (1953) Section 5, Project I 280-6-(4)., Northfield Avenue to Kenilworth Place, Parcel 234, Martha Fitzgerald, widow. On April 14, 1963 an agreement was approved with Martha Fitzgerald (widow), in the sum of $8,615 including down payment of $2,150. The down payment provided for in this agreement was not made because the title search revealed that Martha Fitzgerald [illegible] had only a ½ interest in the property; the remaining ½ interest being held by James Foster, Bertha Foster and Donald Foster (a mental incompetent). Because of this title complication, the agreement was rescinded and condemnation proceedings authorized to acquire title. The Title Officer now reports that a guardian has been appointed for the mental incompetent (Donald Foster) and good title can now be conveyed by all the parties in interest. It is therefore recommended that condemnation proceedings previously authorized be discontinued and authority granted to accept a Deed and pay the full consideration of $8,615 provided for in the agreement. (Jan 28, 1964)

Right of Way-Route 35

84. There is presented again the matter of acquisition of property on Route 35 (1953), Section 10, From Morristown Road to Route 36, Project U 72-(7), Parcel 26, Thomas F. Heinz and wife. An agreement was previously approved in the sum of $100.00. Completion of the title search revealed a mortgage held by Newark Federal Savings and Loan Association. This mortgage was an F.H.A. approved mortgage and therefore the release would be subject to the approval of the F.H.A. We are now advised that the F.H.A. will approve execution of said release only upon payment of the sum of $664.00. This is far in excess of the agreed price made by the owner in his agreement with the State. He is therefore unable to convey title and the matter is submitted with a recommendation that the agreement be rescinded; and that authority be granted to institute condemnation proceedings for the acquisition of Parcel 26 in fee simple subject to any public utilities existing in the premises. (Jan 28, 1964)

Right of Way-Route 78

85. There is presented a report concerning a relocation payment to the owner, Mr. Otto Furst of Parcel 69, on Route 78, Section 5A, Project I-78-5-(11), on which a Right of Way Agreement was approved November 29, 1962. In accordance with the approved agreement, the owner vacated the premises, February 13, 1963, and thereafter presented a receipted bill in the sum of $75.00, to cover his relocation cost. On investigation of our records, it was found that this owner had not been properly notified that he would be eligible for relocation payment. Further investigation reveals that the cost of $75.00, is fair and reasonable. Authority is requested to make payment to this owner on the basis of the receipted invoice and the executed relocation certification in the amount of $75.00. (Jan 28, 1964)

Right of Way-Route 38 (1953)

An appeal was previously authorized from a condemnation commissioners' award in the sum of $97,500.00. At the trial before a Judge and Jury, the testimony on behalf of the owner was in the sum of $125,000; and the testimony on behalf of the State was in the sum of $70,200. The Jury rendered a Verdict in the sum of $106,000 plus interest from the date of entry, May 3, 1963, amounting to $3,926.80. This resulted in a total Judgment in the sum of $109,926.80. Claims-Settlements

5. This claim arises out of damage to highway lighting equipment located on Route 4 Parkway, Clark Township Area, Union County, New Jersey damaged by a vehicle owned by David T. Neblitt and operated by Ralph W. McQuiston, Jr. on July 9, 1956. Billings were prepared and sent to the above named individuals shortly after the accident but no payment was made until 1960 when $10.00 was received from Ralph McQuiston. In an attempt to recover the full amount of the Highway Department's claim, suit was instituted against Ralph McQuiston in November, 1963. David Nesblitt was omitted since his present whereabouts cannot be ascertained. A compromise settlement has now been offered by the grandfather of Ralph McQuiston who claims that full or partial payment of the claim by his grandson is impossible because of his financial circumstances. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that the offer of settlement in the amount of $114.96 made in this case be accepted since this offer and payments received would result in recovery by the Highway Department of more than one half of its original claim, and that no further time or effort would be required in order to collect this claim. (Feb 5, 1964)

6. The above named employee of the New Jersey State Highway Department sustained personal injuries as the result of a third party accident occurring on May 19, 1960. The accident occurred when this employee was struck by a vehicle owned by Edward V. Begany, operated by Florence Rosenweig as he was walking across the highway in the vicinity of North Avenue, Elizabeth, New Jersey. As the result of said injuries,

(continued on next page)

(continued)
the State Highway Department was required to expend the sum of $4,736.08 by way of temporary compensation and medical and hospital services. A permanent award was also entered as the result of a formal petition having been heard before the Division of Workmen's Compensation whereby this employee was awarded the sum of $6,737.50. The State Highway Department's total obligation arising out of this accident amounted to $11,500.58. As of this date, the Department has actually expended the sum of $9,263.08, as there still remains to be paid on the permanent award, the sum of $1,662.50. This employee retained the services of an attorney to institute a suit against the third party involved in this accident. When the case was reached for trial, the employee's attorney was concerned about the legal and factual situation involved in the presentation of his case and discussed settlement with the insurance carrier representing the third party with a view toward obtaining a possible settlement in advance of trial. The best offer which the employee's attorney was able to obtain was $13,500. Mr. Stanton has furnished the Claims Bureau with a letter in connection with the proposed settlement in which he outlines his thoughts relative to the liability aspect of the case. In the event that the State obtained full reimbursement minus the legal statutory deductions consisting of contributions toward the attorney's cousel fee and the costs preparatory for trial, it would receive the total sum of $5,804.55. By the terms of the proposed settlement, the State will receive the sum of $3,000 net and will be relieved of making any further payments on the permanent award which now amounts to $1,662.50. Completion of the Title Search reveals that Mrs. Morris does not own the northerly 27 feet of the lot over which the easement is required. It appears however, that she and her predecessors in title have been in possession and have used this 27 foot strip for many years. In order to acquire good title, it would be necessary to institute condemnation proceedings and to ascertain the continuance of title under a Will probated on January 4, 1894. This would not only be difficult but would also be costly. It is therefore recommended that authority be granted to accept a Grant from Mrs. Morris covering Parcel E103 including all of her right, title, and interest in the 27 foot strip in question; and to pay the consideration of $300 therefor. Claims-Settlements

3. This claim arises out of damage to Highway guard railing located on Route #29, Hopewell Township, New Jersey, damaged as a result of a motor vehicle collision involving vehicles of Wasyl Bilak and Thomas N. Cook on October 2, 1953. After difficulty in locating the named individuals, suit was instituted by the Claims Bureau on behalf of the State for recovery of $417.31 which constitutes cost of repair to the damaged state property. An offer of settlement has now been made on behalf of one of the defendants, which offer proposes to pay the amount of $208.66 in full settlement of this claim. The Claims Bureau has concluded that in view of the difficulties involved in trying the case, the age of the claim and the substantial size of the offer of settlement, acceptance of this offer would be in the best interest of the State. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that tentative approval be given to accept the offer of settlement in the amount of $208.66 and at such time and thereafter that the unpaid balance be cancelled rather than incur additional expense and risk in the trial of this case.
